

I3 Project Client Meeting

Date of meeting – 11/05/2022

Start time – 8:25AM

End time – 9:05AM

Present: Arlen, Filipe, Isaac, Jay, Sanjay

Absentees: N/A

1. Announcements

-

2. Discussion

- What to do about the release of student work folder
 - A: provide a download link, uc activates, (must be able to see files but not download until then)
 - Send email to the student with download link to their work
 - The student client should always show the filenames of documents in their previous assessments workfolder, with timestamps. The documents should not be viewable or downloadable until the UC has marked them as such.
 - Rather than locking the folder on the student's computer the files should be deleted at the end of an assessment. They will be stored on the backend
- On student client should we show past assessments?
 - Should show files submitted, show last time submitted
- How do we stop students from copying files?
 - We can't prevent it, will have to live with it.
- What do we need for student signup
 - Just curtin id
 - Students finish signup in lab with the account creation code provided
- Student client dashboard: what to show
 - Show notification for past assessments, to prompt user if they have unseen messages/uc notification/able to access files
- Should student client show future assessments
 - Yes
 - Show status
- Hannes: should the system send assessment notifications
 - Let the students configure this
 - This is an extension

- Should we be doing it by default? Need to discuss
- With version control do UC's need access to other versions
 - Show list of versions
 - Extension(low priority): show deltas between versions, this would likely require a lot of work
- Time extension
 - Time should be added as a flat time
 - Or as a one per hour extensions.
- Will some students need to start assessments before others?
 - Yes
 - This is an extension
- Requirement for downloading the assessment docs before the assessment?
 - Need to avoid 100 students downloading the same thing at the same time
 - Once the software has started, download assessments starting soon
- Presenting powerpoint
 - Student dashboard
 - Force a save?
 - Check if saved recently
 - If no force save
 - Extension to disable autosave, allowing student to decide:
 - Make timer go red when limited time left.
 - Uc dashboard
 - Need colour
 - Too simple
